Profile Summary

Bachelor's student in Artificial Intelligence Engineering (3rd–4th year) with a strong interest in Machine Learning, Deep Learning, and Data Analysis. Has a solid foundation in Python and data science libraries, with introductory experience in machine learning frameworks. Completed academic and personal projects in machine learning and front-end development. Highly motivated to enhance practical ML skills through structured training and international certification.

Education

Bachelor of Artificial Intelligence Engineering
University of Palestine
2023 – Expected Graduation: Summer 2027

Technical Skills

Programming Languages:
- Python (Good)
- Java (Basic – ~40%)
- Dart (Beginner)
- HTML, CSS, Bootstrap

Machine Learning & Data Science:
- NumPy, Pandas
- Matplotlib, Seaborn
- Scikit-learn (Basic)
- TensorFlow & Keras (Introductory)

Background Knowledge in:
- Machine Learning
- Deep Learning
- Neural Networks

Tools & Environments:
- Jupyter Notebook
- Visual Studio Code (VS Code)

Projects

House Price Prediction – Machine Learning Project
- Developed a regression-based machine learning model to predict house prices
- Performed data preprocessing, visualization, and model training
- **Tools:** Python, Pandas, NumPy, Matplotlib, Scikit-learn

Front-End Development Projects
- Designed responsive web interfaces using HTML, CSS, and Bootstrap
- Focused on clean UI design and responsive layouts

Currently Learning
- Dart programming language
- Flutter framework for cross-platform mobile application development

---

Languages
- Arabic: Native
- English: Good (technical reading & understanding)
